

The Divided Land (Sweden)

(March 30, 2004)

Dream

I saw, in Sweden, a land which was divided in half. One side of the land was dark and cold. The ground was hard so that the dirt appeared as large boulder rocks. On the other side of the land, the ground was tilled with rows such as a field ready for planting. The dirt was rich with moisture and was under a very strong light from the sky which gave it an extremely lustrous appearance.

Interpretation of Dream

The land and the ground are different kinds of hearts. There are hearts in Sweden that are prepared and ready for the prophetic seed of the Word of God. God is always there to love and help those who search Him and hunger after Him. He that has ears to hear, let him hear what the Spirit is saying to the church. (Mark 4)
